MUHAMMAD AHMAD

AI & Data Science Specialist | Machine Learning Engineer | Data Engineer | MLOps Engineer

Phone: 03070131060
Email: m.ahmadgill01@gmail.com
Portfolio: ahmad-gill.github.io/ProtFolio
LinkedIn: linkedin.com/in/muhammad-ahmad-gill-427772262

PROFESSIONAL SUMMARY

Data Scientist & Engineer with hands-on experience in **Machine Learning**, **Generative AI, MLOps**, and Full-Stack Development. Skilled in designing scalable data solutions, deploying ML models, and building automation pipelines on cloud platforms. Passionate about leveraging data-driven innovation to solve complex problems.

EDUCATION

LAHORE UNIVERSITY OF MANAGEMENT SCIENCES (LUMS) — Lahore, Pakistan
Master of Science in Artificial Intelligence — 2025 – 2027

NATIONAL UNIVERSITY OF COMPUTER & EMERGING SCIENCES (FAST-NUCES) — Lahore, Pakistan
Bachelor of Science in Data Science — Jun 2021 – Jun 2025

EXPERIENCE

Data Scientist & Cloud Engineer — Pakistan
GlowingSoft Technologies — *Aug 2025 – Present*
- Built predictive ML models with integrated cloud-based data pipelines to deliver actionable insights.
- Automated workflows using AI tools and deployed scalable Azure infrastructure with Terraform (IaC).
- Managed and optimized Azure data storage, compute, and ML services to support analytics and predictive modeling.

Junior DevOps Engineer — Pakistan
Cybersoft North America — Apr 2025 – Aug 2025
- Built and maintained CI/CD pipelines in Azure DevOps, provisioning scalable infrastructure with Terraform.
- Automated data workflows and database pipelines using Python & Bash, reducing processing time by 30%.
- Optimized cloud resources with Azure Cost Management, cutting costs by 15%.

Junior Data Scientist — Pakistan
Coding Square Technologies — May 2024 – May 2025
- Preprocessed large datasets to improve ML model performance.
- Designed and deployed OCR models for extracting data from government documents, increasing accuracy of digitization by 40%.
- Integrated AI-driven solutions into client systems, enhancing decision-making processes.

SKILLS

- **Programming & Development**: Python, C/C++, Java, JavaScript, MERN Stack, Django.
- **Data Science & AI**: Machine Learning, Deep Learning, NLP, Generative AI, Computer Vision.
- **Frameworks & Libraries:** TensorFlow, PyTorch, Keras, Scikit-learn, Pandas, NumPy, OpenCV.
- **MLOps & Data Engineering:** Databricks, Stream Data Processing, MLOps, Catalog Management
- **DevOps & Cloud**: Azure, Terraform, Docker, CI/CD, Bash.
- **Other Tools**: Git, Selenium, Matplotlib.

CERTIFICATIONS

- Machine Learning, AI, and Data Science (Government of Pakistan)
- Foundations: Data, Data, Everywhere (Google)
- Prepare Data for Exploration (Google)
- Process Data from Dirty to Clean (Google)
- Analyze Data to Answer Questions (Google)

SELECTED PROJECTS

CCTV Video Analytics for Insight Extraction (Final Year Project)
- Built an object detection system using YOLO, OpenCV & TensorFlow with 92% detection accuracy.

Deepfake Audio Detection – AI Voice Authentication System
- Built a deepfake audio detection model using wav2vec 2.0 XLS-R, AASIST, and OC-Softmax for AI-generated voice detection.

LangGraph-Driven Autonomous Chrome Dragon Game Development
- Built a self-generating Chrome Dragon game using LangGraph with dynamic Engineer and QA nodes.

Vision-Based Autonomous Robot Navigation System
- Built an AI vision system for real-time scene segmentation and autonomous navigation using PIDNet.

Brain Tumor MRI Detection
- Applied deep learning models on Kaggle dataset; compared multiple approaches to optimize accuracy.

Real-Time Face Detection & Email Notification System
- Created webcam-based face detection with automated email notifications.

Stream Data Handling with Databricks
- Used Databricks for real-time stream data processing and catalog management with Gold, Silver, and Bronze layers.

RAG Pipelines with LangChain Integration
- Developed RAG pipelines with LangChain and LangGraph for efficient file search and LLM-powered information retrieval.
